

Eldes Utility software – one tool for all devices

Local and remote configuration. Free download below.

What exactly is ELDES Utility?

Eldes Utility is a software designed to fully configure, install and export/import settings for Eldes systems: ESIM384, ESIM364 (from v2.13), EPIR3 (from v1.06) and Pitbull Alarm (from v2.01).

Innovative software, running on main technology platforms (Android, Windows, Mac OSx).

This tool will help You to keep in touch with Eldes.

Faster technology will let You save the installation time.

Whom is this for?

Integrators and installers need just one tool – Eldes Utility tool to fully operate all Eldes devices – starting with basic systems, going to most sophisticated configuration. The tool supports most popular languages, and includes multilingual HELP section, which saves lots of installation time. This tool can read, write, do local (USB) or remote (GPRS) configuration, if device and SIM card supports mobile data.
