

# C4DRV-PERIMETER

## Add 1 Perimeter detection system to C4

### One single interface controlling multiple complex systems

---

Security and facility management has evolved into a complex set of business functions, which all need to be managed taking safety and security of the staff, visitors and physical assets as a priority. There are numerous factors driving complexity: multiple sites, remote locations, flexible working hours, number of employees and visitors, as well as evolving needs.

Therefore only an integrated management solution is able to cope with this evolution, providing facility and security managers with a clear view and control over these different functions.

Imagine one interface to manage and control on-site or remotely all of your security needs on various premises, ranging from intrusion and fire detection to access control and video surveillance.

Imagine these different systems to interact thanks to a seamless integration enabling verification of events through video streams and linking intrusion and fire events with access control to safeguard the safety and security of people.

### The whole is more than the sum of its parts

---

#### Intrusion

C4 supports Advisor Master, Advisor Advanced, Verex and Guardall control panels as well as many 3rd party devices. It provides alarm management combined with video to quickly and efficiently resolve any alarm. It also allows easy configuration of persons requiring access to restricted areas.

In case of intrusion alarms the floor plan pinpoints the location and a relevant live video stream can start automatically while lights and doors can be controlled by pressing one button. The presence of intruders is easily verified by switching to recorded video streams and the log file will keep track of the route followed as any detector causing further alarms will add details into the historical log.

### Details

---

- Add connection to additional driver
- Driver from list of Perimeter category
- License per control panel or controller
- Requires specific Gamanet product number to identify specific device

# C4DRV-PERIMETER

## Add 1 Perimeter detection system to C4

### Technical specifications

---

#### General

Product line	Advisor Advanced
Software type	Management Software
Supported technology	Intrusion

#### Software details

License type	Driver
