

EasyGate SPA

Paid Access Solution

The only solution which offers both standard and wheelchair access with a convenient payment terminal and high security.

How costly is it to run the sanitary facilities?

Have you ever calculated it?

Make your sanitary facilities profitable.

Places with a high number of visitors, such as gas stations, metro stations, shopping malls and other establishments face high costs of running sanitary facilities for their visitors. It's not only your guests who use your sanitary facilities which can make the operating costs very high.

What is the best solution?

The most efficient solution is a sophisticated speed gate with an integrated payment terminal, which reduces the labour/operating costs, vandalism and prevents unpaid access. Paid access not only covers the costs but also brings additional income.

Intuitive, Advanced and Secure

The EasyGate SPA is a sophisticated paid access solution designed to ensure self-service payment for entry while securing the premises against vandalism and usage by non-paying visitors. In comparison traditional tripod turnstiles, this solution brings the advantage of only one access for both - standard and wheelchair access. Thanks to the extended glass wing barriers and the advanced optical sensors, the EasyGate SPA provides maximum protection against climb over and crawl under the barriers.

EasyGate SPA

The EasyGate SPA solution enables you to monitor and display the number of passages, turnover statistics and the entrance fee collected.

The advanced coin manager accepts coins, gives change and accepts payments by credit/debit cards as well. The integrated RFID reader and barcode scanner allow VIP entry by using RFID cards or vouchers with barcodes. Also optional printing of vouchers which can be used at the other point of sale is available too.
